This and his having been engaged in one of the leading houses in Toronto for twelve (12) years as a first cutter, should be a satisfactory guarantee that he is what we claim him to be, an A1 man. A large number of suits we have turned out in the past two weeks have been acknowledged by all who have seen them as superior to any clothing in cut and finish ever turned out in this city. This and his having been engaged in one of the leading houses in Toronto for twelve (12) years as first cutter, should be a satisfactory guarantee that he is what we claim him to be, an A 1 mun. The larger portion of these goods have been imported direct from the best English and Scotch manufacturers, and are the choicest productions of some of the best known makers. We have also just to hand a large stock of

## English and French Worsted Coatings, Fancy Trowserings,

OVERCOATINGS, &c., equal to any other house in Ontario. As we have done in the past, it shall be our aim in the future, to use in the manufacture of our clothing nothing but first class trimmings, and smploy competent hands in making them up. With a large and past experience in this department, we feel that we can with every assurance ask the public to give us that lib-oral patronage so largely bestowed us in the past, and warrant them perfect fits and satisfaction in every respect.

### OUR NEW CUTTER.

We have at a large salary secured the services of Mr. WM. MORLEY, of Toronto, who comes to us with the best recommendations from some of the leading Merchant Tailors in Canada it is possible for a cutter to have. This and his having been engaged in one of the leading houses in Toronto for twelved (12) years as first cutter, should be a satisfactory guarantee that he is what we claim him to be, an A I man. A large number of suits we have turned out in the past two weeks have been acknowledged by all who have seen them as superior to any clothing in cut and finish ever turned out in this city. Mr. Morley solicits a trial suit.

Estimated and Actual Revenue and Expenditure

The following is a comparison of the estimates made by Sir Leonard Tilley in March, 1880, with the actual result:—
Estimate. Actual Reyenue,
Clustoma revenue, 815,300,000 to 818,400,003 to 818,400,003 to 818,400,003 to 618,400,003

That the success of the N. P. as a nue producer has been demonstrated

beyond question.

2. That there is a surplus instead of a deficit as under Grit rule, thus improving the credit of the country and enabling the Government to reduce the interest on the

the croit of the country and enabling the fooremment to reduce the interest on the public debt.

3. That the expenditure falls below the estimates by \$610,000, thus demonstrating the economy of the Government.

It would puntle any of Sir Richard Cartwright's organs to discover such ponts for congresionation as to any year's opera-tions under his leadership of the Finance Department.

The Assassin of the President.

The Assassin of the President.

A corraspontant writing frees Sitting sends the following query —" is there a passibility of Giltiens being hump by state law for the murder of the President?" The District Attorney of the District of Columbia is of opinion that the assassin cannot be rised for a higher crims than murder in the second dagree, which is equivalent to manifester. This opinion is based upon a law of the United States which provides that tilling is not nurefer in the first degree in case the victim goes into a country or state other than that in which he received the injury, and dies there.
